## DEFENSE OPERATIONS & EXECUTION SOLUTIONS INCORPORATED

Defense Operations & Execution Solutions Inc. (DOES) is a Defense Tech startup, research, and innovation facilitation firm, with a mission to establish sustainable design and manufacturing facilities within the most vulnerable communities and HUBZones across the United States. By forging strategic alliances with both Federal and Local governments, Historically Black Colleges, and Universities (HBCUs) and Minority Serving Institutions (MSIs), and Corporations, DOES is poised to develop new high-technology offerings that exceed current technological advancements, as well as supplement existing production lines to boost defense and commercial industrial footprints. Specifically, DOES is concentrated on leveraging and developing critical technologies that align with the SBA-DoD "Small Business Investment Company Critical Technology Initiative":

- Refining and recycling precious and rare earth minerals for green technologies
- Producing raw materials for the medical, biotechnology, and pharmaceutical industries
- Architecting Model-Based Systems Engineering (MBSE), and trusted AI/ML for autonomous systems
- Designing and manufacturing scalable microelectronics and advanced quantum computing hardware
- Developing advanced materials for parts/components for automotive, aviation, and space applications

*"When our nation calls... DOES, does it!"*

## COMPETENCIES

Strategic  
Alliance  
Building

Program/Risk  
Management

Research &  
Development

Rapid  
Prototyping

Advanced  
Manufacturing

**DOES**  
does it.

## FOUNDER'S EXPERIENCE

- Active Top-Secret Clearance
- 16+ YOY in Aerospace & Defense
- HBCU Alumni, focused on developing strategic alliances with HBCUs and MSIs
- Degrees & certifications in:
  - MS. Project Management
  - Master of Business Administration
  - MS. Systems Engineering
  - Certificates:
    - Six Sigma
    - Lean Manufacturing

## DIFFERENTIATORS

- Integration Concepts For Open System Standard Compliant Advanced Mission Systems
- Facilitation Of Agile Software Development
- Fabrication Advanced Aerospace Composites
- Concept Of Operations Development for Advanced System Of Systems
- MBSE Architecture Strategy
- Autonomous Platforms
- Artificial Intelligence/ Machine Learning (AI/ML) Techniques
- Condition Based Maintenance Architecture (CBM+)
- Modeling & Simulation
- Electro-Optical Systems
- Electronic Attack, Electronic Defense, Electronic Warfare
- Dual-Use and Multi-Use Component Development
- Digital Transformation Tool Concept Development
